# feel free to Isabella your Caravan

**The fairy tale writer Hans Christian Andersen**

Once said "To travel is to live" We, at Isabella, would add "... and to live is to feel free." For Isabella, camping is all about experiencing a sense of freedom.

**It is our vision** to inspire you and to create a space that gives you that sense of freedom to be together, the freedom to do everything and the freedom to stop along the way.

**You only get one shot** at your next trip, your next holiday or your next weekend break, and that is why we work tirelessly every day to ensure that you can feel that sense of freedom with Isabella.

**To be truly free**, you must also be free of worries. The special Isabella quality, the unique design and the carefully considered features ensure that you have nothing to worry about in that respect. You can rest assured that an Isabella awning works.

**We are proud to present our 2016 collection**

Have a good look through our new brochure and... feel free to Isabella your caravan!

# PRISMA

With its depth of 4 metres, Prisma is the largest awning in the Isabella range since the 70's. Prisma's flexibility, high durability and strong frame make it the ultimate awning for permanent pitching. The front can be moved back and forth to create a living room with a covered terrace (with the use of optional extras).

The large windows ensure that Prisma is a bright, welcoming awning where you will spend many an enjoyable hour. For maximum stability, Prisma is supplied with a MegaFrame frame. If you want to use Prisma as a year-round awning, additional poles can be purchased to ensure added stability in the off-peak season.

**1** **Front divider**, additional front panels (2 pcs), right or left panel (for partition) which give more scope for variation.

**2** **Light strip** in the roof.

**3** **Mosquito nets** in both sides.

# PENTA THIRTY

Thirty years ago – in 1985 – the first Penta awning saw the light of day. And we’re celebrating that with the Penta Thirty. Penta Thirty has everything you require from a permanent pitch awning – a depth of 3.5 m without the nuisance of a centre pole, and designed so that every inch of space is used. The material used is Isacryl, a strong acrylic which allows the awning to breathe. Mosquito net windows in both sides, and the numerous opening options, make for an optimal indoor climate. A sand-coloured roof imbues the awning with a soft warm light and the combination of the light strip in the roof and the large windows of clear film make the Penta Thirty awning a bright and friendly place to spend time. The sturdy pole construction and the pentagonal shape mean stability for a long season at the campsite. Choose between the strong Zinox steel frame or the extra-strong Zinox MegaFrame for added stability. The combination of MegaFrame with extra winter securing means you can use your Penta Thirty all year round.

**Optional extras:** Annex 220, door canopy, inner roof, partition wall, storm securing set.

### MATERIALS

## COMMODORE SEED

Commodore Seed is a family awning which is spacious, light and airy. The warm, subdued colours, breathable Isacryl material, large windows and numerous opening and ventilation options make it an oasis of comfort. With a depth of 3 metres it offers every opportunity for the family to find the space for play and relaxation. Commodore Seed is suitable for both permanent pitching and touring. Commodore Seed has frosted window foil in the lower window panels, which gives you a beautiful inflow of light and also offers privacy. For trips to warmer climates, the mosquito net windows in both sides offer plenty of scope for ventilation on hot days and the CarbonX lightweight frame makes it easy to handle. For optimal stability for permanent pitching, we recommend the Zinox tubular steel frame with the T-Rex locking mechanism, which makes it easy to tension and assemble. or for extra durability the Zinox steel Megaframe.

- 1** Frosted window panels.
- 2** Mosquito net in both sides.
- 3** Integrated top ventilation.

**Removable/fold-down panels:** Front and side panels.

**Special details:** Mosquito net in both sides.

**Comes as standard:** with Urban Sand curtains, veranda pole, draught skirt, wheel arch cover, FixOn, Typhoon storm sashes awning bag, pole and peg bag including peg remover.

**Optional extras for assembly:** Annex 250, door canopy, net side, net front, Cosy Corner II, partition wall, front sun canopy, gutter, storm securing set.

## COLOURS

## MATERIALS

## COMMODORE INSIGNIA

Commodore Insignia is a fusion of classic Isabella design and contemporary materials. Its depth of 3 metres and the choice of three types of frames are a major advantage, especially for those who alternate between permanent pitching and touring and enjoy having plenty of space in the awning. Large panoramic windows make Commodore Insignia a pleasant place to be, with a unique inflow of light. For a pleasant indoor climate, the Commodore Insignia model has mosquito nets with a foil cover in both sides, as well as an integrated top ventilation panel in the middle of the front. On hot days and balmy evenings, the nets keep out annoying insects, at the same time allowing the air in the awning to circulate.

## AMBASSADOR SEED

With more than 30 years on the market, our customers rightly expect a lot of the 'Ambassador', the ultimate touring awning which is straightforward to put up. Relatively light in weight, with a depth of 2.5m it offers all the opening options you could possibly wish for.

Ambassador Seed has mosquito net panel in both sides and is made of Isacryl for a pleasant indoor climate. The roof is coated on the outside and has a patterned inside, which minimises the formation of condensation.

## MATERIALS

## CAPRI COAL

Capri Coal is the ideal choice for touring caravanners. In lightweight, breathable, acrylic material the Capri Coal is quick to erect and easy to transport. The tinted windows make the awning a pleasant place to be, as they tone down the bright sunlight and the large mosquito net windows provide extra ventilation without the annoyance of insects on hot summer days and nights. All front and side panels can be folded down to form a veranda or removed completely. Capri Coal is available with the Zinox tubular steel frame or the ultra-light CarbonX fibreglass frame.

# Tips & Tricks

We love sharing our knowledge with you, so we have put together our top 10 tricks which, among other things, can help with the challenges commonly faced by new campers putting up an awning for the first time. These are tips which ultimately could help extend the life of your awning, and thus the joy of camping.

## 1. Position of rafter poles

The rafter poles in the awning sides should not be placed horizontally along the seam, but in the curvature of the awning to support the roof, thereby ensuring better tensioning of the awning.

## 2. Pegging

Start by pegging the back corners by the caravan, and then the shelter triangle inside the awning. Then peg the two front legs, giving them a good tug forwards and to the side. (Watch video at [www.isabella.net](http://www.isabella.net)).

## 3. Tensioning

When it is time to tension the side rafter pole and front legs, it can be helpful to unzip the side and/or the front, to achieve optimal tensioning.

## 4. Veranda pole

If you need more ventilation in the awning on a hot day, the supplied veranda pole can be used in either the front or side. When using it on the side a small triangle has been sewn in where you can mount the veranda pole.

## 5. Lubrication of awning rail

To facilitate insertion of the awning in the caravan rail, you can spray the rail with Isabella Aquatex reproofing spray. Remember to check the rail for sharp edges!

## 6. Use the regulator tab

When putting up the awning, it is important to use the sewn-on regulator tab at the two corner legs and middle leg. They should be used to tension the fronts and to obtain the correct distance from the ground, so as to achieve tension in the pegging rubbers. On a flat surface, you use the middle hole and if the ground is a little uneven, you can use one of the other holes.

## 7. Repair set

Should you be unfortunate enough to sustain a tear or a hole in your awning, Isabella has two small repair kits that can help. There is one for the PVC material and one for the acrylic material in the awning.

## 8. Hercules Triple

To ensure that your awning is put up in the best possible way, you can buy and use a Hercules Triple pole tensioner. It is important to tension the awning really well, as this will make it more stable.

## 9. Distance from the ground

There should always be a distance of 7–16 cm (can vary from caravan to caravan) from the ground to the edging that finishes off the awning before the mud flaps begin. This is very important in order to achieve tension in the pegging rubbers all the way around the awning. When there is tension in the pegging the awning is well tensioned, and thus better protected against wind and weather.

## 10. When leaving the awning for long periods

The standard frame is fine for general camping, but if the awning is to be used for more extreme purposes (i.e. when it is left for long periods), it is a good idea to supplement it with additional rafter poles and support poles.

## MINOR

When it has to be easy, smart and comfortable, Minor is the answer. Minor comes with a lightweight CarbonX fibreglass frame – which is fast and easy to assemble. The panoramic window in the removable front panel provides a natural inflow of light and a good view. There are doors and a mosquito net in both sides, which can be closed by zipping the foil cover over it. The material is breathable Isacryl which helps create a pleasant indoor climate. As with all of Isabella's porches, you get the best seal to the caravan.

**Removable/fold-down panels:** Front.  
**Special details:** Mosquito net in both sides.

**Supplied as standard with:** Set of curtains Bowline Grey, draught skirt, wheel arch cover, FixOn, awning bag, pole and peg bag incl. peg remover.

**Optional extras for assembly:** Veranda pole, storm securing set.

## MAGNUM 250 COAL

Magnum 250 Coal is a touring-friendly porch which is quick to put up when you're on the go. With Magnum 250 Coal, you get a spacious porch awning 2.5 metres in depth. The breathable Isacryl material ensures a pleasant indoor climate.

The front and side panels can be folded down/removed and, together with mosquito nets in both sides, offer a wealth of ventilation options. If more space is required, inside or out, Magnum 250 Coal can be extended with an Eclipse front sun canopy, Cosy Corner II or an annex which gives you an extra bedroom or additional storage.

## AWNING – DESIGNED FOR THE ADRIA ACTION 361 CARAVAN

The best holidays are a mixture of busy action packed days, and times to relax and chill out, to make the most of all occasions there is no better place than an Isabella awning.

A caravan with a unique shape needs a specially designed awning and we have done just that for the 361 Adria Action European caravan model. It matches perfectly to the vehicles unique lines and is both elegant and functional.

**Material:** Front in Isacryl, beautiful colour fast, fibre-dyed acrylic. Side panels and roof made in coated polyester and lower panel is PVC for easy cleaning.

**Details:** The front panel can be removed or drawn. The ventilation net window feature in the right hand side panel has a zipped foil cover.

**Included:** Curtains, draught skirt and wheel arch cover.

**Frame:** Lightweight combination of Aluminium and CarbonX fibreglass. Adjustable roof poles. Screwless FixOn II- brackets.

**Total weight incl. frame:** 30,8 kg

# Take good care of your awning

**How to get a few extra years out of your awning.** It pays to look after your poles and the canvas. Studies and tests conducted by Isabella have clearly shown that proper maintenance can add years to the life of your awning. Campers who spend a lot of time at campsites by the sea or in wooded areas are most likely to experience problems with their awning. The problems usually involve leaks, which in many cases are caused by improper or inadequate maintenance. The surroundings have an impact on the awning's waterproofing, for example, and extra care of the awning is required when camping in these areas. We have therefore put together tips from some of our top camping experts, so that you can enjoy your Isabella awning for many years to come.

**Storm securing.** To ensure that your awning is as secure as possible, we recommend that you mount storm bracing on the legs at the front of the awning. The strap should go around the corners – down along the pole inside the awning and then be pegged there. The guy rope should not be completely taut, but a little loose, so that it does not pull on the awning, but is there in the event that the awning is about to “take off”.

If the awning is to remain in one place for a long time, we recommend the use of the longer 30 cm plastic pegs all the way around, and securing with Isabella storm straps inside, as well as Typhoon guy ropes mounted at the corners. Isa-Link straps mounted under the windows prevent the canvas from pressing too hard on the poles during stormy weather, and in calm weather, they should just rest on themselves. If the awning is to be permanently pitched, the strong Mega-frame is an option with most models, which, with extra winter securing, is optimised for year-round use.

**Underlay for the flooring.** The awning floor should always be fitted with a moisture barrier. The “Isabella Ground Sheet” is a tarpaulin, which is placed a good way up over the mud flaps, and slightly up the sides, so that moisture from the ground does not come up into the awning, and water from the outside and drips from the ends of the zips do not get onto the underlay. The optimal underlay consists of “Isabella Ground Cover” under the entire awning, which protects the mud flaps and makes cleaning easy. Next, you might like to lay the “Isabella Floor” floor tiles, which form a good, stable surface to walk on in the awning and provide a solid base for permanent pitchers. “Isabella Ground Sheet” as a moisture membrane and “Isabella Comfort Carpet” over the tarpaulin provide a soft, comfortable insulating base. “Isabella Carpet” is a carpet, which forms a pleasant surface to walk

on, and all of these layers ensure minimal absorption of air humidity for the best possible indoor climate.

**Cleaning, washing and reproofing.** The cleaning, washing and reproofing of the awning should be part of the ongoing maintenance. The Isabella Isa-Clean range consists of four products for regular washing, a slightly more heavy-duty wash, and “Anti Mould”, which can remove mildew. Window Clean is a must for the windows. Condensation in the awning is impossible to avoid at certain times of the year, and it increases significantly if awnings do not face south. Ventilation and the correct underlay help. A large number of people in the awning combined with one or more heat sources add to the condensation. Check that the small, plastic “DropStop” ring is correctly installed in the eyelets in the roof to prevent water penetration by the spikes. Regular vacuuming of the inside of the entire awning prevents the build up of soil dust and soil bacteria, which quickly form a base for the growth of mildew when the humidity rises. Reproofing should be carried out as needed, and permanent pitchers are recommended to perform a thorough wash and full reproof every two years.

**Taking down and packing up.** Before taking down the awning and packing it away, it should be cleaned, removing any fronts and sides.

There are many ways of folding the awning, but the method we show you in the video at [www.isabella.net](http://www.isabella.net) is the method we use ourselves. Spread out the awning with the inside of the roof facing down on the carpet or dry grass, the entire front lying over the roof and the sides pulled out to the sides. Then fold the sides in over the roof, forming an oblong surface with straight sides. After that, fold in from the sides until it is an appropriate width for the awning bag, and then roll from the front and in towards the bead. This prevents dirt from getting into the awning from the bead, and the next time the awning is put up, the bead is easily accessible on the caravan side.

For further information, please visit our support pages at [www.isabella.net](http://www.isabella.net) and watch the informative set up videos, and especially our YouTube channel where you will find a large number of information videos.

**IsaClean All-Year**  
A cleaning product for regular cleaning of the awning.  
(900060431)

**IsaClean Season**  
A cleaning product for use at the end of the season when your awning needs a good clean before being packed away for the winter.  
(900060432)

**IsaClean Anti-Mould**  
A cleaning product used to combat mould or mildew.  
(900060433)

**IsaClean Window**  
For cleaning the awning windows. To be used with the microfibre cloth included.  
(900060434)

**After using IsaClean,** we recommend re-proofing your awning to ensure a water-repellent surface. We recommend **Isabella's AquaTex** for this.

## WINTER

Thanks to the heavy-duty materials, a special roof angle to prevent the build-up of snow, an extra wide external mud flap, a strong steel frame, flexible pegging and window foil designed to withstand extreme temperatures, Isabella's Winter awning will stay the course – even in a heavy snow storm. The model is made of easy-to-clean polyester/PVC material and has doors in both sides as well as zipped ventilation.

Distance between roof poles 203 cm  
 Suitable for caravans with an awning rail height of between 235 and 250 cm

**Special details:** External mud flap, special roof angle, extreme window foil.

**Supplied as standard with:** Set of curtains Bowline Grey, draught skirt, wheel arch cover, FixOn, awning bag, pole and peg bag incl. peg remover.

UNIVERSAL 420 COAL

## UNIVERSAL 420 COAL AND 360 COAL

Thanks to their great strength and stability, the Universal 420 Coal and Universal 360 Coal porches can be put up in all weather conditions – all year round. Two support poles press the sewn-in foam pads securely against the side of the caravan, while click profiles hold the sides directly on the support pole for a perfect seal. Universal 420 Coal and Universal 360 Coal have doors in both sides and large windows across the front, giving a good view. The strong Zinox steel frame ensures good stability. If Universal 420 Coal or Universal 360 Coal is to be used as a year-round awning, we recommend the fitting of winter securing and an inner roof (optional extras). The roof construction provides unobstructed opening of the caravan door and minimal build-up of snow.

Distance between roof poles 420: 410cm, 360: 350 cm

## VILLA 550 AND 650 - ALL YEAR

Villa a unique year-round/permanent pitching awning, available in two widths. Its construction has been designed with maximum stability and durability in mind. Isabella Villa is modular, and the choice of front panels means that you can construct your Villa just as you want it.

The awning should not only be suitable for use on hot summer days, but also a good alternative when the snow is lying on the ground. Year-round use places high demands on the equipment, and Isabella Villa is composed of the best materials. The optimal sloping of the roof prevents the build-up of snow. Light is life, and the large windows and white curtains contribute to a bright, comfortable living space. The window material can withstand extreme cold, and Villa is also equipped with flaps in the fabric to make it easy to close and cover the windows as required. The deep overhang all the way around prevents dirt and pollution, so you can spend your days relaxing, instead of on

maintenance.

Isabella Villa has been designed to make it easy for you to put up yourself. Your local dealer can also advise you if you wish to have it ready-assembled. The modules are zipped together, simplifying the construction and making it easy to change the front modules without having to dismantle the entire awning.

Isabella Villa is equipped with a padded sluice and connecting piece in the roof, so it can be used on all sizes of caravan (special adjustment may be necessary, especially on small caravans). The caravan can be attached or removed in a few easy steps, though full backing is required (extra) if Isabella Villa is to stand without the caravan. Isabella Villa can also be adapted as standard to mobile homes with a max. height of 265 cm.

# For year-round campers/permanent pitchers

Villa 550  
5 out of a total of 9 possible combinations

Villa 650  
6 out of a total of 18 possible combinations

## TECHNICAL INFORMATION

**Ground:** Depth 300 cm Length 550 cm or 650 cm

**Colour combination:** Tweed/Flax.

**Awning canvas:** Solid-dyed Isacryl.

**Roof fabric:** 520 g/m<sup>2</sup> PVC/Polyester welded joints.

**Curtains:** Frame.

**Frame/Construction:** 40 x 40 mm aluminium profiles with angle brackets.

**No. of doors:** At least two. Ventilation in both sides. Overhang all the way around.

### Supplied as standard

Villa comes complete with 40 x 40 mm. aluminium profile frame, roof, fronts and sides with window flaps, connection set with roof sluice, 2 cushions, draught skirt and standard wheel arch cover. The awning comes with two 70 cm, back wall section, so that the opening 550 cm and 650 cm at the back will be 410 and 510 cm. All parts can be replaced in the event of damage. Height at the back approx. 240 cm.

### Optional extras (additional cost)

Closing back wall panel.

Inner roof.

Winter securing set (cross bar and support poles).

Gutter.

F-module: Closable front panel with mosquito net.

Villa Connection Tunnel 70 cm 550.

Villa Connection Tunnel 70 cm 650.

Villa Porch Roof/left or right.

Villa Windscreen Front.

Villa Windscreen Side.

Villa Porch Back.

**We recommend:** placing the awning on a fixed floor measuring 300 x 550 cm or 300 x 650 cm. Talk to your dealer or a local carpenter about this.

### NB!

Villa must be mounted on a 10 cm-high floor.

## SHADOW TOURING SUN CANOPY

Shadow is the multipurpose touring canopy, which can be put up in a jiffy no matter where you are. In addition to being mounted on the caravan itself, Shadow can also be used as a side canopy on the awning. Combine with the sides and net front (optional extras), to give extra shelter and protection against the sun under your Shadow. The particularly strong and stable pins on the poles and metal rings in the roof provide optimal tensioning and greatest possible stability.

- 1** Net front is available in fitted sizes and can also be used on most existing canopies (optional extra).
- 2** Net side (optional extra) with connection strip and beading in both sides.
- 3** The net side is supplied with FixOn brackets and "Tectum" system (roof pole and a click multi-connector for easy assembly).

### MATERIALS

## SUN SHINE SUN CANOPY

The greatest possible stability and lowest possible weight are united in the Sun Shine canopy. Zip pockets on the front poles ensure that the sun canopy is stable and prevent it from flapping in the breeze. Sun Shine comes complete with a right and left side. Channels for the roof poles and CarbonX frame with the IsaFix connection system make putting up and taking down fast and efficient. If you already have an Isabella full awning in 3.0 or 2.5 m depth, the frame can also be used for the sun canopy. Ask your dealer. A front is available as an optional extra for your Sun Shine Canopy. (Can also be used on Sun Blue). Enabling the Sun Shine to be converted into a lightweight touring awning in next to no time.

**Depth (cm):** 250

**A-measurement from-to (cm):**

## ECLIPSE SUN CANOPY

Not only is Eclipse suitable for use as a front sun canopy on Isabella's awning models, but it can also be used as a light-weight touring sun canopy directly on the caravan. Eclipse is fastened to the overhang of your awning, creating a lovely shady terrace and increasing the area under cover. The light-weight CarbonX frame with the IsaFix connection system as well as the TectumPro building system, make it fast to put up. For extra shelter, a side can be purchased as an optional extra. It fits both the left and right-hand side of the front sun canopy, but it cannot be used on the Eclipse for Magnum.

**Depth (cm):** 225/Magnum: 216  
**Sizes from-to:** G14-G21

**Supplied as standard with** CarbonX fibreglass frame with Tectum Pro system and F-link, Typhoon storm sashes, transport bag

**Optional extras for assembly:** Side (right/left), but not for the Magnum model. The side panel (optional extra) for Eclipse is easily assembled using plastic connecting strips. The side panel can be used on either the left side or right hand side.

Sorry sides are not available for the narrower Magnum Eclipse.

1

**Tectum Pro** is a revolutionary new connection system for simple click assembly.

2

**F-links** to be added to the awning poles.

3

**Optional extra** for assembly the Eclipse side directly on the caravan, with the Eclipse side adaptor (**9999R0177**)

### MATERIALS

## COSY CORNER II

If you need shelter or simply good screening by the door, where you can sit and soak up the atmosphere at the campsite, Cosy Corner II is the perfect solution. Depth approx. 150 cm. Cosy Corner II is easy to assemble by virtue of its sewn-on beading and connection sections as well as Tectum Pro and lightweight CarbonX poles. Cosy Corner II can be positioned to the right or left of the doors at the front of the awning. If you would like a larger cosy corner, two Cosy Corner II's can be placed next to each other to form an extra angle. Please give the awning's A-measurement when ordering!

## DOOR CANOPY TO CARAVAN

with a door canopy on your caravan, you get a fast and stable solution for providing some shelter at the door into the caravan. This allows you to open the caravan door without the rain or snow getting in. The door canopy feeds into the awning rail and is secured at the bottom by attaching it to the base rail of the caravan with a beading bracket – simple and easy.

**Dimensions:** 145 x 180 x 95 cm

**Weight:** 3.8 kg

**Material:** Isacryl.

**Frame:** Zinox with T-Rex locking mechanism .

**Colour:** Granite.

## CONVERT YOUR FIAMMA AND OMNISTORE DOOR CANOPY INTO AN ISABELLA ROOM

The front of the door canopy has a large door on the right, which can be rolled up and tied with a ribbon. The extra wide mud flap can be used inside or out as needed. Adjustable straps for optimal tensioning. The large windows of the canopy front provide a wonderful panoramic view.

**Door canopy side Universal.** The right-hand side has a door and a large window. The left-hand side has two large windows. The sides are easily attached with Velcro. The side pieces also have an extra PVC piece, which is pressed in against the caravan. Together with adjustable straps, this ensures the best fit against the side of the caravan. The parts are supplied with detailed assembly instructions.

The door canopy front and sides are made of 100% polyester with a PVC mud flap. Colour: light grey/grey and steel blue. Curtains and curtain poles are available as optional extras.

- 1 PVC wing for best fit to unit.
- 2 Attaching the front.
- 3 Side panels attached with velcro.

## FIND AN ISABELLA ANNEX TO FIT YOUR AWNING

Need more storage space or an extra bedroom in the awning?

Isabella offers various solutions.

Annex Coal and the new Annex Insignia are tall annexes offering maximum height and a lightweight frame in CarbonX.

Annex Tall also has a maximum height but comes with a steel frame.

All Isabella annexes are equipped with an extra zip so the awning's side panel can be used as a partition wall.

## A space of your own...

It has long been trendy to create your own personal style in your home – a style that is functional, creates space and cosiness as well as sending a signal about who you are and the values that are important to you. A growing number of caravanners are now taking this trend with them out into the awning. This is where you spend your holidays, so this is also where functionality, cosiness, space and an individual look should come together to form a comfortable and visual whole. Give some thought to your needs before

furnishing the awning. No matter how big your awning is and whether you are tourers or permanent pitchers, it is important to fit out the awning to your requirements. This way, you will experience the awning as a natural extension of the caravan.

If you are a permanent pitcher – or a seasonal camper, as it is also known – you can pretty much furnish the awning as you like.

**Permanent pitchers** typically choose highly robust and slightly heavier furniture. Here, the table is large with space to seat many guests, with chairs that go with the dining table and other chairs for relaxing or perhaps even deckchairs or sun loungers for use outside the awning.

**If you are a touring caravanner**, it is important to take functionality and weight into account. Here, the table should be as light as possible without being unstable. And preferably just the right size for the family to sit around it. If you want to eat with other campers, there is still nothing stopping you. The table is not particularly heavy, so you can easily move it to where it is needed. The chairs should also be lightweight. They should be suitable for use at the dining table, and also outside for relaxing in the sun. That is why many camping chairs are multi-position chairs with a reclining seat back. The table is the focal point of the awning. This is where you eat, have fun, play games and spend time together as a family. But you can increase the functionality of the awning and furnish it to your own needs and taste. The small camping stool is probably one of the most brilliant and versatile pieces of camping furniture. It neither weighs too much nor takes up all that much space during transport, and it can be used as extra seating for guests or children. It can also be used as a footrest in front of the multi-position chair. A lightweight tabletop is available for most stools to convert them into a small table. The table can be used to put things on and if you should need more seating, simply remove the tabletop to turn it back into a stool. It is smart and most campers have one or more in the awning.

**Space for everything.** It does not take long to accumulate things in the awning: drinking water, towels, beach sheets, toys, shoes and so on. All of these take up space, and are usually all necessary, but the awning can easily end up looking cluttered. One way of avoiding this is with cabinets and shelves for storage. They do not cost the earth, and as most of them can be folded up, they can be used by permanent pitchers and touring caravanners alike. The cabinets come in many sizes, most of them with one or more shelves, a closable front and a top that can be used to put things on. Fortunately, if you don't have room in the awning or cabinets in the awning are not really you, there are other options – i.e. Organizers.

Organizers is the common term for small, lightweight and foldable storage solutions. They are available as mobile units, e.g. Isabella's Multiorganizer, which can be used for everything from toys and towels to bottles, and are easy to move. There are other Organizers, which can be hung in the caravan or on the awning's poles. They are smart and do not take up floor space. But they should only be used for lightweight items so as not to overload the awning poles.

**Well-planned furnishing.** When you furnish your awning, give some thought to where you put your table and chairs, etc., as there should be room to move about in the awning. It is, for example, handy to have a place for coats and shoes just inside the door of the awning. You should also leave enough space in front of the caravan door to be able to get in and out without having to edge past tables or chairs. If you have children or grandchildren with you, they should have a corner of the awning where they can play, read or play games without having to move every time you need to get past. This might mean forgetting 'how we normally do things', and rethinking the layout of your furniture, but it will give you more elbow room and peace in the awning.

**Use colour and light** as a way of putting your own stamp on the décor in the awning. If you like a bit of zing, you could, for example, liven up the décor with seat cushions and blankets in bright, contrasting colours. But if peace and balance are more your thing, then seat cushions and blankets that match the colour of the furniture might be the way to go. The tableware, tablecloths, place mats, etc., all help to determine the choice of colour and the look of

the awning. An often overlooked point when furnishing is the lighting in the awning. Many people make do with a pendant lamp over the table in the awning, and that's it. Others also use the caravan's awning lamp. It might provide plenty of light, but it is not especially cosy or personal. If you want to create a space of your own, the lighting is important. And the new dimmable LED lamps give you an incredible number of options. You can, for example, use lighting tracks with LED bulbs. Many of these are easily mounted directly onto the awning poles, they are quick to set up, and they use very little power. They give you light right where you want it, and as most offer stepless dimming, you can easily create your own atmosphere in the awning.

**The awning is your space**, and whether you use an awning or just a sun canopy, this is usually where you will spend most of your time on holiday. So it is important to get it just right. There are plenty of opportunities for individual interior design, and you should not be afraid of trying out different ideas.

Stylish, comfortable furniture can make all the difference to your camping experience. It is important to have furniture that suits the needs of you and your family. Camping furniture should be comfortable, easy to clean, easy to transport and take up as little space as possible when folded up. The hallmark of all Isabella's furniture is that it is practical, has an attractive, simple and functional design, is made of easy to clean, lightweight materials and can be folded together to take up a minimum of space when not in use – not only perfect for camping trips and trips to the beach, but at home on the terrace, too. Isabella's furniture range comprises of sun loungers, chairs, tables and folding cupboards in various shapes and sizes. There is something for every taste!

## A SPACE FOR EVERYTHING...

With an Organizer™ from Isabella, you have a place to put all those little bits and pieces in the awning. Use it to store all the things you want to have easy access to, such as sun lotion, a towel, playing cards, magazines or the children's toys, etc. If you need a practical, roomy bag, Isabella has bags for a variety of purposes – everything from bags for storing your awning to a smart, spacious cooler bag.

6

**1. Accessory bag/Sports bag (900060218)** perfect for all your accessories **2. An Isabella Peg bag (900060300)** keeps your pegs in order. Also perfect for power supplies, etc. **3. Practical sponge bag** for use when camping. The bag can be hung up, providing easy access to all its contents. It has a watertight zip and plenty of pockets to keep all your toiletries together. Colours: **Mercury (900060411)** or **Scarlet (900060410)** Measurements: H20 x W30 x D10 cm **4. Cooler bag (900060420)** Keep your sandwiches and fizzy drinks cold with this cooler bag. It is perfect for picnics and trips to the beach or to have with you in the car. In addition to a large insulated cooler compartment with space for both food and drinks, the cooler bag has a small insulated compartment in the lid. There are also zipped pockets on the lid and at the front as well as mesh pockets on both sides. The cooler bag has a shoulder strap and handles on both sides. Made of PVC-coated polyester, it comes in an attractive dark grey colour. Dimensions: H36 x W34 x L27 cm **5. Luxury travel bag (900060421)** A good, spacious bag that can be used for a variety of purposes – a perfect weekend or gym bag, for example. The bag features a large compartment with an internal mesh zipped pocket for small items and an internal compartment with Velcro strap closure for items such as a laptop. The bag also has a separate zipped compartment in the base for storing wet clothes, shoes, etc. Made of black synthetic leather, the bag measures H30 x W21 x L54 cm and has a wide, adjustable shoulder strap and a good sized handle **6. Low Organizer** is a practical, useful storage space, for magazines, shoes etc. It fits onto the side of the caravan, is made of coated polyester and comes in a choice of sizes.

# Easy and delicious Grill for campers

**Camping and barbecuing go hand in hand** – it's going to be one hot summer! When the campsites are populated, an increasing number of campers choose to light the barbecue. More and more people have discovered how easy it is to cook the various meals of the day on the barbecue – and just how compatible barbecue culture is with camping.

**In fact, both camping and barbecuing** are the epitome of cosiness, and when cosiness is combined with a delicious meal, it really is food for the soul! This is certainly one of the main reasons that the smell of barbecue food wafts between the caravans and tents, adding an extra dimension to life on the campsite.

**A barbecue for everyone.** As a camper, you have the choice of a gas barbecue or a charcoal barbecue – a choice that is largely determined by the grill master's temperament. While some people favour the simple operation of the gas barbecue and its ability to reach the desired temperature in next to no time, others swear by the charcoal barbecue, believing there to be more of a challenge in mastering the traditional type of grill.

**For obvious reasons, some people choose a portable barbecue,** while others have the possibility of barbecuing on a larger static model. Regardless of its heat source or size, the barbecue offers undreamt of possibilities to cook the most delicious meals – whether you like delicate seafood, succulent chops, crisp grilled chicken or something else entirely.

## CHOPS WITH FENNEL BUTTER AND SALAD

**Ingredients:** 4 250 g chops.  
Fennel butter: 100 g butter, ground fennel, curry powder, 40 g breadcrumbs, salt, pepper.  
Fennel salad: 2 fennel bulbs, herbs – e.g. parsley, chives and sage, 1 apple, lemon juice, olive oil, salt, pepper.

### IN THE KITCHEN

**1.** Mix the soft butter with the ground fennel, curry powder and bread crumbs – the amount of fennel and curry powder you use depends on how spicy you want the mixture. Season with salt and pepper. Spread the mixture between two sheets of baking paper – roll it out to a thickness of two millimetres. Put in the freezer for 30 minutes.

**2.** Prepare the salad. Wash the fennel and herbs. Slice the fennel into wafer-thin slices – use a mandoline if you have one. Finely chop the herbs. Rinse, core and finely slice the apple. Toss with the lemon juice, olive oil, salt and pepper.

### OUT AT THE BARBECUE

**1.** Set the barbecue to a high, direct heat – leave it until it is good and hot. Oil the grate well before placing the chops on the hot grate. Grill for 2–3 minutes on each side. Season with salt and pepper.

**2.** Just before taking the chops off, place a slice of fennel butter corresponding to the size of the chop on each. Remove from the barbecue, and allow to rest for 3–4 minutes before serving with the salad.

## CHICKEN SATAY WITH TORTILLA

**Ingredients:** 4 chicken breasts.  
300 ml coconut milk, juice of 1 lime, 2 tsp red curry paste, 1 clove garlic, oil for grilling, 4 tortillas. Peanut sauce: 150 ml crunchy peanut butter, 100 ml coconut milk, 2 tsp red curry paste, ½ tsp cumin, 1½ tsp sugar, juice of 1 lime, 1½ tsp fish sauce.

Serve with: Salad of Chinese white radish, carrots, cucumber, fresh coriander, mint, lime, toasted sesame seeds, chilli.

### IN THE KITCHEN

Soak the bamboo skewers in water for 30 minutes.

**1.** Mix the coconut milk, lime juice and red curry paste together. Peel and chop the garlic and stir it in. Place the chicken pieces in the marinade, and leave to stand for 30 minutes.

**2.** Prepare the peanut sauce. Mix all the ingredients together, adding fish sauce to taste.

Thread the chicken pieces onto the skewers and prepare the accompaniment.

### OUT AT THE BARBECUE

**1.** Set the barbecue to a medium high, direct heat. Oil the grate, and place the skewers on it. Grill the chicken for 6–8 minutes on each side.

**2.** Heat the tortillas. Assemble the tortillas with salad and other accompaniments, and top with the chicken and peanut sauce.

## CLASSIC GRILLED LOBSTER

**Ingredients:** 500 g lobster tails.  
Bread: 40 g yeast, 700 ml water, 35 g salt, 400 g durum flour, 600 g plain flour. Herb butter: 150 g butter, 2 cloves garlic, fresh herbs – e.g. dill, chives, chervil and parsley. Mayonnaise: 2 pasteurised egg yolks, 1 tsp vinegar (tarragon vinegar, wine vinegar or distilled vinegar), 1 tsp salt, 300–400 ml grape seed oil, 50 g chives.

### IN THE KITCHEN

**1.** Peel and devein the lobster. Place in an oven proof dish and refrigerate until you are ready to grill them.

**2.** Make the dough for the bread, if you are making the bread yourself. Dissolve the yeast in the water. Add the salt, durum flour and plain flour a little at a time. Mix to a relatively firm dough, and leave to rise for 15 minutes in a warm place.

**3.** Peel and finely chop the garlic. Rinse and finely chop the herbs. Mix both into the butter and chill until you are ready to use it.

**4.** Now roll the dough into long baguettes, and cut into individual portions. Place the bread on a lined baking tray. Leave to rise for a further 15 minutes.

**5.** And now for the mayonnaise... Whisk the egg yolks, vinegar and salt to a light, airy consistency. Gradually add the oil in a thin stream. Season to taste. Rinse and finely chop the chives and stir into the mayonnaise. Chill.

### OUT AT THE BARBECUE

**1.** Set the barbecue to a high, indirect heat. Place the pizza stone in the middle of the cooking grate, and leave until the barbecue has reached 250 degrees. Place the baking tray on the pizza stone, and bake the bread under cover for 25–30 minutes. Remove from the barbecue and leave to cool for a minute or two.

**2.** Spread a little herb butter on each lobster.

**3.** Now set the barbecue to a high, direct heat. Oil the grate well. Place the lobsters on the grate, back down. Grill for one minute, and then grill them briefly on the other side. Serve immediately with mayonnaise and bread.

# Isabella Flooring Concept

## ISABELLA FLOORING CONCEPT

At Isabella, we know that it takes all sorts of campers to make a world, and that there are many different ways of enjoying life on the campsite. So we have created a concept that meets every need when it comes to flooring in the awning.

The Isabella Flooring Concept covers your flooring needs, whether you are a permanent pitcher, a touring caravanner, a year-round caravanner, a summer caravanner or a combination of them all.

The types of flooring are the same – it is how you put them together that makes all the difference, and thus determines how well your needs are met.

To make the choice easier for you, we have put together three camping scenarios for inspiration, each with a different composition of flooring in the awning – one for touring caravanner situations and two for permanent pitchers.

So here you go... Now you can select your flooring according to your own personal requirements with regard to maintenance, comfort, stability and finish.

# 1

### FOR TOURING CARAVANNERS who travel and for whom comfort and easy cleaning are paramount, we recommend:

**Isabella Ground Cover ...** protects the awning against

soil splashes and mud

**Isabella Ground Sheet ...** to prevent the penetration of moisture from  
the ground.

**Isabella Carpet ...** for an attractive, easy-to-clean finish.

# 2

### FOR PERMANENT PITCHERS who stay in one place and for whom comfort and easy cleaning are paramount, we recommend:

**Isabella Ground Cover ...** protects the awning against

soil splashes and mud

**Isabella Ground Sheet ...** to prevent the penetration of moisture from  
the ground.

**Isabella Comfort Carpet ...** for soft, insulating comfort.

**Isabella Carpet ...** for an attractive, easy-to-clean finish.

# 3

### FOR PERMANENT PITCHERS who always stay in the same place and for whom comfort, fitted underlay and easy cleaning are paramount, we recommend:

**Isabella Ground Cover ...** protects the awning against

soil splashes and mud

**Isabella Floor ...** for a fitted, even floor.

**Isabella Ground Sheet ...** to prevent the penetration of moisture  
from the ground.

**Isabella Comfort Carpet ...** for soft, insulating comfort.

**Isabella Carpet ...** for an attractive, easy-to-clean finish.

## COMFORTABLE FLOORING FOR YOUR AWNING

Isabella Carpet matches your Isabella awning perfectly and in a choice of quality to suit your camping needs. Our quality carpets are made in a smooth-woven combination of nylon threads, spun with PVC and finished in a heat press, so they can be fitted to any awning and even trimmed without fraying; they are lightweight and can be easily folded and cleaned.

**Premium** smart, high quality design

**Regular** unique strong weave **Light** a squared design

**Premium 1. Sol** 2,5-3,0-3,5 m **2. Frigg** 2,5-3,0-3,5 m

**Regular 3. Freja/Light Grey** 2,5-3,0 m **4. Idum/Dark Grey** 2,5-3,0 m **5. Trud/Blue** 2,5-3,0 m

**Light 6. Grid** 2,5 m

### IsaGrip (900060290)

IsaGrip is a clip used to hold carpets and underlay in place. IsaGrip is easy to fit without damaging the carpet.

ISABELLA COMFORT CARPET

ISABELLA GROUND SHEET

ISABELLA FLOOR

ISABELLA GROUND COVER

**Flooring for comfort layer upon layer** Start by laying Ground Cover over an area bigger than the awning to protect the mudflaps and awning materials. Then lay Isabella Floor over the entire awning area, remember the edging strips for a neat finish especially in doorways. A Comfort Carpet keeps the heat in and is soft and comfortable to walk on. Finally, lay an Isabella Carpet for a beautiful finish that's easy to keep clean.

**Isabella Ground Cover** is the perfect underlay – a thin but strong sheet that lies on the ground, it protects the awning canvas from soil and mud, and because the mudflaps are not in contact with the ground they are easier to clean. Supplied on rolls of 2 x 18 m (36 m<sup>2</sup>). Ground Cover is fully breathable and suitable for touring sites.

**Isabella Comfort Carpet** is a soft, insulating comfort underlay which is placed between the plastic barrier or wooden floor and the awning floor covering to keep cold and damp at bay. It also provides a soft floor area to sit and walk on. Supplied on rolls of 1.5 x 15 m (22.5 m<sup>2</sup>).

**Isabella Ground Sheet** The Isabella Ground Sheet is available in different sizes to fit the awnings. Put it under the awning carpet to avoid moisture from the soil. Isabella Ground Sheet has plastic reinforcements in the corners with ring for pegging and reinforced edges, so it will last for years. Colour: Anthracite. Material: PU 160 g/m<sup>2</sup> Depth: 270, 320 or 370 cm Lengths: 500, 600, 700 or 800 cm

**Isabella Floor**

If you spend a lot of time in your awning, you want good insulation, and a floor that is smooth and level. Isabella Floor offers a full range of advantages. It is easy to install without the use of tools, the 50 x 50 cm tiles simply snap together like building blocks, no other parts are needed. It is easy to store and exceptionally durable.

With the option to purchase edges for Isabella Floor, you can create a beautiful finish.

Isabella Floor uses a unique interlocking system.

5

**1. A door canopy** offers shelter at the entrance and is available in colours to match Isabella awnings. (Fig. Commodore) **2. Penta Black door canopy** fits your Penta awning. Made of PVC, it provides extra shelter at the entrance **3. With a Netfront** you can choose to unzip the entire front panel to either side and replace it with the net front. You can also leave your front panel in place and with the use of the veranda pole, have the net in the upper half and the awning front in the lower half of the panel. This can be an advantage in hot climates where good ventilation is a must. Net front is reversible and can therefore be used on either the right or left side by simply clipping to the awning poles. Net front fits Commodore Seed, Commodore Insignia, Ambassador Seed, Capri Coal and some older models (in sizes G14-G20) **4. Universal wheel arch covers for the caravan.** To prevent draughts and cold from getting in via the wheel of your caravan, a good wheel arch cover is essential. Isabella now offers a universal wheel arch cover that fits all caravans. The wheel arch cover is screw-free, ensuring that you don't make holes in the caravan when fitting it. It is mounted with a rail on the side of the caravan with a strong double-sided tape. The wheel arch cover is available in widths of 75 cm or 150 cm and can be adjusted in height. If required, the rail can be shortened. **75 cm (481100075) 150 cm (481100150)** **5. Net side** for mounting on the side rafter pole means the entire side panel can be quickly unzipped and replaced with a complete mosquito net side. This is especially beneficial in a hot climate, where good ventilation is a must. The net side is available for awnings with 3 m or 2.5 m deep sides.

**1. Coated polyester partition wall** with window, available in two sizes to fit all Isabella awnings with a depth of either 2.5 m or 3 m. The partition wall is also available for Penta. When you wish to use the full width of the awning, the entire inner panel can be zipped off. Optional curtain hanging directly on the partition wall using curtain clips (optional extra) **2. Window canopy** with sun filter keeps out the sun but provides an unrestricted view. The canopy is available in two widths: 190 cm or 215 cm in charcoal. The pole construction is very simple, and it fits almost all caravans. With Band-it™ softgrip, the window canopy is quick and easy to fit **3. Aluminium roof gutter with spout.** Fitted beneath the harlequin trim on most models; prevents dirt and water from running down the sides. Available in lengths of 300, 350 or 400 cm **4. Storm securing sets (900060195)** give awnings extra protection in strong winds and prevent wear and tear to the canvas. **Isabella peg remover. (900060005)** **5. Hercules Triple™ (900060453)** the ultimate aid for the tensioning of all pole types **6. An inner roof** minimises the formation of condensation and is recommended for caravanning in the off-peak seasons. Opening for access for light cord. Fitted using TermoFix fittings and available for Prisma, Penta, 3 m and 2.5 m deep full awnings, Universal and Winter awnings **7. If you dream of camping in the winter, we recommend that you use the winter securing set**, which protects the awning and frame in heavy snowfall. It consists of two additional rafter poles, FixOn II and three support poles. Available for all Universal and winter awnings.

# Thank you!

from all of us

We are the people behind Isabella. We live and breathe for camping. So we put every effort into producing a unique product for you, because we know how much it means.

Our pride and passion are rooted in craftsmanship throughout the process, starting with the materials, which are carefully selected and tested, cut, sewn, packed, checked and then sent out to the retailers. A great deal of thought goes into every detail – the details you can see, and those you can't.

We have proud traditions and have developed a whole host of unique construction and sewing techniques over the years. Techniques that have yet to be emulated, and which take time to learn. But we would rather get it right than choose the easy solutions.

Isabella is all about craftsmanship. Each Isabella awning is the result of good craftsmanship and a sense of quality in the selection of materials: the fabric, the zips and everything else besides. Added to this is our ability to think along new lines – to be innovative and creative.

A great many hours go into each and every product. Everything is made according to our principles of craftsmanship. Here at Isabella, a machine cannot replace people, and all our products rely on intuitive flair and the dream of the freedom that camping brings.

Thank you from all of us to all of you who have appreciated this craftsmanship over the years!

CarbonX

**CarbonX™ FRAME**

a carbon-fibre reinforced fibreglass frame, is suitable for both permanent and touring caravanning. Carbon Fibres are combined with glass fibres in varying amounts, according to pole diameters, to offer maximum strength. The frame is light and fully corrosion resistant. All CarbonX frames are supplied with the IsaFix locking mechanism. With IsaFix in place, keeping the frame in position is easy. With one press of the hand grip, a discreet “click” tells you IsaFix is locked in position.

Zinox

**Zinox™ STEEL FRAME**

is hot galvanised both inside and out to extend its life and to meet all load bearing requirements. The steel frame is made of ISO-certified high-strength steel. The strength of the Zinox steel frame makes it particularly suitable for pitching your caravan permanently – and it is included with all Universal and winter porch awnings, because caravanning in the off-peak seasons demands great structural stability due to weather conditions such as strong winds and snow.

Zinox MegaFrame

**Zinox™ MegaFrame**

The Zinox MegaFrame is a durable tubular steel frame (material thickness: 32 mm/1.2 mm) with welded corners and double screw lock on the poles. MegaFrame is designed for year-round use with a full awning which can remain standing all year, and can withstand powerful storms, snowfall and torrential rain. The Zinox MegaFrame is supplied with two extra rafter poles, as well as one Hercules 32.5 mm.

**IsaFix™ LOCKING CLAMP**

included on all CarbonX frames or update your own fibreglass frame! IsaFix can be fitted easily to any Isabella frame, replacing telescopic couplings and wing nuts for quick and efficient assembly of the awning frame.

**T-Rex™ LOCKING MECHANISM**

for the Zinox steel frame locks the poles in place and keeps them tensioned in all weather conditions with one press of the hand grip and a discreet “click”.

**CarbonX LAYERS**

1. Lengthwise fibreglass reinforced with carbon
2. Cross winding
3. Lengthwise fibreglass
4. Clockwise cross winding

SHADOW	500	400	360	300	240
	5,3	4,8	4,5	3,7	3,6

To determine the “A-size”: Park the caravan on level ground. The “A-size” is the length from ground level, through the awning channel and back down to the ground. This can be done easily with a piece of string. We have a database of caravan sizes from 1970 onwards on our website, [www.isabella.net](http://www.isabella.net). For Porch/Part awnings the caravan channel height determines the fit. All Isabella full awnings can also be used as part awnings. Using a foam pad, support pole and two click profiles. Measure your caravan “Full awning as large/small Porch” as shown and match to the nearest Isabella “A” size. This solution works for new and older models the parts are all supplied as optional extras.

**Isacryl** is a spinneret-dyed (i.e. the fibres are dyed), textured-weave, durable acrylic material. Isacryl has the highest achievable fade-resistance thanks to the pigmentation method. The density of the weave plus the impregnation all the way through prevent water ingress. Nevertheless, Isacryl is a breathable material, which facilitates the best possible indoor climate in the awning.

**Isacryl Light** is an extra lightweight acrylic material, making it especially suitable for touring.

**PVC/Polyester** is intensely resilient and water resistant material.

**IsaLite** is a coated polyester material, which is durable, lightweight and easy to keep clean.

**The window foil** is the best available on the market. In some of the models, the window foil is also tinted to tone down the sun's rays, and in awnings for use in winter, a foil is used which can withstand sub-zero temperatures.

All Isabella awning **roofs** are made of strong, acrylate-coated polyester, with an added top coat to help prevent the build-up of dirt. The roof fabric is impregnated in 3 layers (with the exception of Capri, which, in order to make it lighter and more touring-friendly, has 2 layers). The roof fabric is stitched with double-folded seams to guarantee it will withstand even heavy rainfall. The inside is patterned to create a pleasant indoor environment, and this also helps make any dirt on the outside less noticeable.

All Isabella awnings are supplied with **curtains**, and the unique thing about the Prisma awning is that you have two different curtain designs to choose from. The curtains are carefully designed to match the awning colours for a harmonious look. The specially developed curtain system ensures that it is easy to put up and take down again. All Isabella curtain materials are given a finishing treatment to withstand environmental impacts, such as mould, rot, fungi or mildew, usually caused by differences in temperature. This special finishing treatment can be restored after washing by ironing the curtain.

936-1035 - G18-19

A900-A1225

- A. Exclusive Typhoon™ storm sash.
- B. DropStop™ rain grommets are fitted to all rivets in the roof.
- C. FixOn™ screwless brackets designed for better tensioning, with easy positioning. Supplied with all Isabella awnings and Sun Shine. The FixOn Multi is included in Magnum, Minor, Universal 420, Universal 360, Shadow, Winter and the remaining models with FixOn II. (Not supplied as standard with Eclipse Front Sun Canopy)
- D. Heavy-duty hard-wearing reinforcements. All D-rings are sewn with PVC reinforcements.
- E. Door ties with press studs for all Isabella awnings.
- F. Isabella curtain system for material that hangs perfectly, with the pattern inside or out whichever you prefer, and allowing curtains to be easily taken down and put up.
- G. To complete your window dressing, all of Isabella's curtains come with tiebacks in the same fabric as the curtains. Tiebacks are easily fitted with a snap fastener on the sewn-in tape in your awning.
- H. IsaFlex™ pegging elastics with great elasticity and strength are supplied with the Isabella range.
- I. The double wing, with separate beading and seam detail, ensures a great fit on all caravan shapes.
- J. The double-folded seams in the roof guarantee a 100% straight & waterproof seam for a better shape roof. The curve of the roof is designed to ensure the best possible fit and better tensioning of the awning.
- K. Storm Securing PVC triangles are firmly sewn under windows for optimum position of IsaLink™.
- L. Substantial four way zips, always run smoothly. Hard wearing and always covered to protect from sun and rain.
- M. Internal mud flap allow the pegging elastics to perform correctly and prevents drafts in the awning. Laying carpet over the mud flap makes an effective draft excluder.
- N. All Isabella awnings have ventilation panels; some are fitted with extra panels and/or mosquito net(s) in the side, these reduce condensation and create the best indoor climate.
- O. Regulator tabs in the corners and spiked shoes on the poles ensure uniform tensioning and reduce wear and tear "locking" the canvas and frame together.
- P. Exclusive storage and transport bags for awnings, along with frame bags and peg bags, are available.
- Q. The frames of Isabella's awnings are pre-assembled for easy assembly. The CarbonX fibreglass frame comes with IsaFix locking mechanism, and the Zinox steel frame with T-Rex locking mechanism. The locking mechanisms make putting up the awning easy and problem-free.
